

AMB-001 Flush mounting connection box

Features

- For submerged mounting of wall mounted controllers, thermostats and sensors
- Embedded depth 40 mm

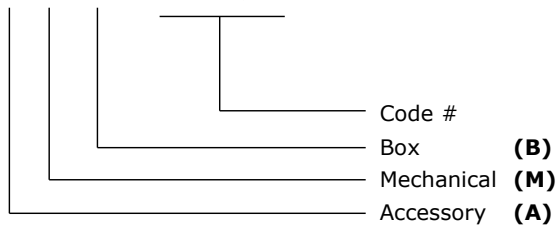

General Description

AMB-001 is used for submerged installation of light switches, wall mounted controllers, sensors and power plugs. The box features two M4 threaded mounting holes with 58 mm (2.3 in) distance. Each side has 2 prepared openings with each 20mm (3/4 in) diameter. There are additional 4 prepared openings in the back wall.

The box may be used to install all standard non -U type wall mounted controls and sensor lines manufactured by Vector Controls Ltd.
