

SDB-T-1 Duct temperature sensor

Features

- Thermistor, PT and NI sensing elements to fit your system
- Wide range of temperature probes
- Single screw cover
- New installation flange for round and flat ducts with patented air tight twist and turn mechanism.

Applications

- On return air ducts to measure room temperatures
- On supply air ducts to measure heating/cooling supply air
- In heat exchangers and air handling units
- As frost protection sensor

Temperature sensor

The sensor measures the temperature by use of a NTC-, PT-, or NI-sensing element. The sensing element is either a glass packed thermistor with a negative temperature coefficient, a platinum film or a nickel thin layer-based probe. Its resistance changes according to the temperature. The change follows a specified curve. Contact our sales department for curves not yet listed below.

Technical Specification

Important notice and safety advice: This device is for use as a temperature sensor. It is not a safety device. Where a device failure could endanger human life and property, it is the responsibility of the client, installer and system designer to add additional safety devices to prevent such a device failure. Ignoring specifications and local regulations may cause equipment damage and endangers life and property. Tampering with the device and misapplication will void warranty.
